Specifications

■ Quattro Clic

Quattro Clic system have been specifically designed to make fitting your laminate flooring as easy and hassle free as possible. The click profiles allow individual panels to be joined together quickly with minimal tools or complications.

■ Handscraped Effect

A breathtakingly elegant and realistic oiled finish, with gentle irregular undulations, inspired by traditional Amish craftsmanship. The soft matt surface replicates the hardwood area of solid flooring gently polished over time due to footfall. Meanwhile the deep matt pores are highlighted with glossy accents.

■ Authentic Embossed

The high quality Authentic Embossed structures feature elegant contrasting and a thrilling multi-gloss effect that emphasises the depth of the structure with matt and gloss elements that reflect the light differently. The synchronous pores follow the grain of the decor, meaning they flawlessly mimic the character of natural wood.

■ Microscratch Protect

This especially durable surface will protect your floors even better against micro-scratches which can occur through heavy use. With Microscratch Protect, your flooring will be well-protected against fine scratches and everyday wear and tear.

■ Stain and Imprint Resistant

Whatever you might spill, whether red wine, oil or coffee, don't panic; it can be easily removed. XMOOD is also abrasion resilient, robust and durable.

■ Eco-Friendly

All XMOOD floors are environmentally friendly as standard made of up to %90 wood sourced from sustainably managed forests. What's more, the entire production chain - from raw materials to the finished product - has been certified and is regularly inspected by independent experts, ensuring peace of mind for you and protection of our environment.

■ 30 Years Guarantee

All XMOOD laminate floors are put through a series of rigorous tests in order to comply with international quality standards, which is why we grant an extensive residential warranty with every product.

■ Anti-Bacterial Coating

Keeping your flooring as clean and free of bacteria as possible is naturally a major concern. A.B.C. Anti Bacterial Coating inhibits the growth of bacteria on your flooring and provides you with the peace of mind that comes from a healthy home environment.

■ Anti-Slip

Safety is something we put great emphasis on. Classification in anti-slip class has been achieved through specially developed surface structures, which address the requirements for floor coverings in the workplace and commercial areas where a high risk of slipping is present.

■ AC5

■ Class 23 - Domestic

■ Class 32 - Commercial

■ 4 Sided V-Groove

Wood is our world.

Because we want to give back to nature what it gives us in quality of life. That's why we are careful to only use wood from sustainably managed forests. PEFC certified. With completely traceable origin. In our manufacturing processes too, the environment is always foremost in our mind. Our objective is to keep waste from our production as low as possible - and indeed throughout the entire product life cycle. We achieve a high recycling rat

within the manufacturing process or alternatively use waste material to generate carbon-neutral energy for our production facilities. Our water and energy consumption is constantly monitored. This enables us to quickly identify potential savings and of course implement them in an environmentally friendly way. This affinity for nature carries over into our products. Our floors are not only environmentally friendly, but also contribute to a healthy living environment.

Your Veroxfloor Partner

The products of which images have been provided on this catalogue contain the full-equipped and diverse products. The product information in this catalogue is valid for the date it's published. The company adopts continuity principle on it's product development policy and reserves the right to change any product information listed in this catalog.
